36-6 x 1 1/2 3000# THRD UNIVERSAL ANVILET

Anvil Anvilets provide a strong branch pipe connection, considerably stronger than a welded pipe-to-pipe connection. Consequently, with good welding procedures, Anvil Anvilets offer greater resistance to distortion and bursting.

Anvil Anvilets readily and economically permit the adding of branch connectors to existing piping installations, eliminating the relatively higher cost of cutting or disassembly and re-assembly required for the installation of tees.

Anvil Anvilets of the same outlet size

Specifications

Industry Standards/Certifications	MSS standard SP-97, ASTM A105, ASME B1.20.1
Type	Universal Anvilets
Style	Threaded
Nominal Outlet	1 1/2 in
Nominal Header	6 to 36 in
Material	Forged Steel

Class	3000
Installation Note	Anvil Anvilets are designed to have no more than a 1/16" gap (1.6mm) between the base or skirt of the Anvilet when it is seated directly upon the appropriate run pipe. However, it is recommended that the skirt of Anvilets be held slightly above the run pipe and tack welded to provide a small continuous root gap between the skirt and run pipe before completing the all-around welding beads or fillet.
Product Number	0766260566
UPC Code	69029196499
HPH Code	NA
Weight	1.15 lb
