

AquaBond Professional-Grade ADHESIVES

Wet Niche Potting Compounds AB-1000 and ABP-1000
Save up to 70% on Wet Niche Potting!

Our Aqua blue, U.L. Listed potting compound, required by National Electrical Code for encapsulating the ground connection in swimming pool and spa wet niches for underwater lighting. Available in our multi-use cartridge (does 5-8 lamps), or single-use Twin-Pack pouch.

Underwater Repair Adhesives UW-5000, UW-5000-400 and UW-5200
Sticks to just about ANYTHING.... wet, dry or Underwater!

Can be mixed and applied underwater - no need to drain the pool! Sticks to just about anything, wet, dry or underwater. Bonds dissimilar materials. Strong, permanent bond with a little flexibility once cured. White available in 50ml and 400ml. Gray is available in 50ml only. The White 400ml version comes with two static mixers.

Structural Repair Adhesives SR-3000 and SRX-3000-400
Now Available in White, Black, Gray or Light Blue!

White, high-strength bonding. Bonds well to dissimilar materials. Hardens in 5 minutes for fast repairs! Available in either our Multi-Use 50ml cartridge or large size 400ml re-sealable system. The 400ml version comes with two static mixers.

Self-Leveling Epoxy CR-2000

Gray, self-leveling, thick-syrup-like epoxy for concrete repair and other general-purpose uses in horizontal applications. Hardens in 4 hours. Available only in our Multi-Use 50ml cartridge.

Non-Sag Epoxy CR-2100 and CRN-2100-250

Gray, non-sag, toothpaste-like epoxy for concrete repair, mounting things on vertical surfaces and other general purpose uses. Stays put on vertical surfaces. Hardens in 4 hours.

Available in both our multi-use 50ml cartridge or our large, caulk tube-sized 250ml system.

Anchoring Epoxy AE-2200-250 caulk-tube-sized 250ml u-tah cartridge
Gray. Anchors threaded rod, bolts and rebar into concrete. Includes 1 static mixer.

Handy Carry Case

Organizes your dispensing gun and 50ml adhesive cartridges, plus there's room to store your static mixers, too.

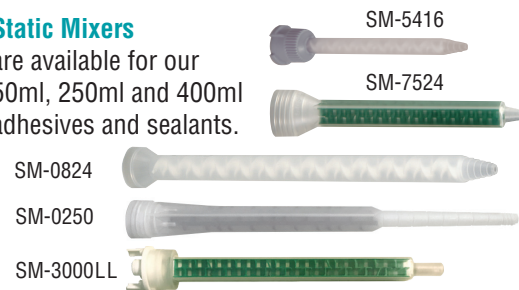

Starter Kits

are available for many of our products. They include one cartridge of adhesive or sealant plus a supply of static mixers.

Static Mixers

are available for our 50ml, 250ml and 400ml adhesives and sealants.

AquaBond Professional-Grade SEALANTS

Clear Underwater Sealant AquaFlex AFC-8200

Specially formulated for sealing hairline, thin and spider crack leaks. **Clear AquaFlex is currently unavailable due to Covid supply chain issues.** No need to drain the pool or spa! Does not need to be applied underwater. Not UV stabilized. Must be over-coated when applied above water to prevent discoloration. Should be applied using our patent-pending Polyethylene (PE) Film method (included). Comes in handy, 50ml Multi-use cartridges.

White Underwater Sealant AquaFlex AFW-8000 Specially formulated for sealing hairline, thin and spider crack leaks. Designed to be applied underwater. Spreads like warm butter! No need to drain the pool or spa. Not UV stabilized. Must be over-coated when applied above water to prevent discoloration. Should be applied using our patented Polyethylene (PE) Film method which is not included with individual cartridge but *is* included with the DMK-W8000 kit.

Waterproof Gap and Seam Filler Sealants ABC-9100-300 and ABW-9000-300 ABC-9100-300 Clear, and ABW-9000-300 White, very high quality waterproof sealers and gap fillers. Perfect for expansion joints and other gaps around the swimming pool area and components. Seals glass, stainless, acrylic, more! Can fill up to 1/2" gap. Our clear is crystal clear!

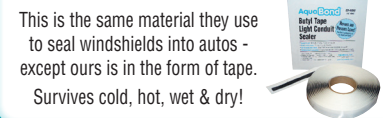

Polyurethane Foam Injection Kit PF-377

Professional-grade, white, polyurethane foam injects and expands to a permanent, water tight seal - through the entire thickness of a concrete pool or foundation wall. Plugs serious, structural cracks and stops leaks. Everything you need for a 10' crack. **Overview:** 1. Stick injection ports to pool wall with included white Surface Seal. 2. Cover the rest of the crack with Surface Seal paste. 3. Inject expanding polyurethane foam. 4. Remove ports and surface seal.

Re-Enterable Electrical Insulating Resin RC-7000-350

Self leveling, liquid, rubber-like potting sealant for totally encapsulating the electrical connections in a horizontally oriented junction box. Cures to a consistency of very firm gelatin. Can be "re-entered" for future electrical work. Generally used for fountains.

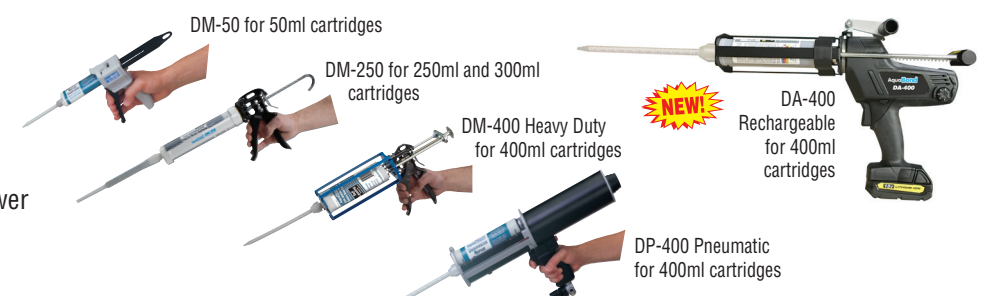

Black Butyl Rubber Tape Conduit and Joint Sealer CS-6000

1/4" wide x 15' roll. Stays flexible in extreme weather conditions from -40°F to 180°F. You'll find many other uses for this sticky, very flexible black tape. Must be applied when surfaces are dry.

Five High-Quality Dispenser Guns

High quality, durable dispensing guns for applying our adhesives and sealants.

No matter the size of your job or the power needed, we have the tool you need!

NEW!

AquaStitch™

AQUABOND

Stress Proof Stitch

Repairs and Stabilizes Concrete Cracks and Fractures in Swimming Pools, Walls and Decks!

Not just simple staples... A long-lasting fix that's both mechanically AND structurally sound! AquaStitch permanently stabilizes and repairs structural cracks and fractures in concrete, gunite and shotcrete swimming pools and pool decks. Use along with our AE-2200-250 high-strength, anchoring epoxy.

10' Crack = SPK-12-10 Kit

5' Crack = SPK-12-05 Kit

Individual Stitch = SP-1238

Repairs structural cracks in concrete, gunite and shotcrete swimming pools

Engineered & designed by pros

Best performing system available

Simple installation - complete Instructions included

Works on flat areas or outside curves

Inhibits cracks from expanding further

Stitches are hot-dip galvanized to prevent corrosion

Guaranteed against manufacturer defects

Available in kits or individually

Kits include stitches, anchors, anchoring epoxy, 12" ruler, static mixers and complete installation instructions.

NEW!

S-STITCH

by AquaBond®

PATENT PENDING

4 Simple Components.

100's of configurations.

Permanently Repairs most cracked concrete!

Patent Pending

* Not for concrete block

New S-Stitch saves you tons of time by grinding shallower and narrower channels which reduces microcracking. You can even double up, or even crisscross S-Stitches for amazing resistance to future movement! S-Stitch 1/4" diameter staples are embedded into cracked concrete and encapsulated in anchoring epoxy. Spanning the crack or fracture, a series of them, installed per instructions, restores and even improves, the strength of the concrete.

Our adaptor plates and bridge adaptors deliver amazing versatility.

Lay-flat installation

Inside and outside corners

Repairs inside and outside corner cracks like no other staple system can!

Incredibly strong, 1144 Stress Proof® steel with special anti-corrosion coating.
