How to Select Parts for Circulators & Pumps on Pages 9-15

The pump nameplate identifies the pump by the series and the six digit part number as shown in the example below.

The nameplate above identifies the pump as a Series HV, part number 102210. The date code shows the date of manufacture as October, 1990 as explained in the chart below. The nameplate identifies the booster pump for future reference. **DO NOT REMOVE THE NAMEPLATE.** It is important when ordering replacement parts to furnish complete nameplate data.

To ensure the correct parts will be selected, follow the procedure below:

1. Determine from the nameplate the pump series, pump construction (if applicable) and the six digit part number.
2. Determine the date the unit was manufactured. See chart below.
3. Refer to the index for the page number of the parts breakdown for the specific booster pump series.
4. Find the proper column in the parts breakdown for the pump involved. Be sure to use the date codes on top of each column where applicable.
5. Select part numbers using the applicable drawings on pages 3, 5 & 7 for identification.
6. When ordering a replacement motor or motor components, always furnish complete motor nameplate data.

DATE OF MANUFACTURE CODE											
The date code is made up of two or three characters depending upon the year.											
1946-1960 The number denotes the month. The last character is a letter and denotes the year.				1961-82 Two characters. First letter is month. Second letter is year.				1983- Three characters. The letter denotes the month. The numbers denote the year.

How to Select Parts for Maintenance Free Series 60, Pages 17-23

The pump nameplate identifies the pump by model number, pump construction and impeller diameter as shown below.

The BTO nameplate above identifies the pump as a Series 60, size 1 1/4 x 5 1/4 in bronze fitted (BF) construction. The impeller diameter is 4 1/4" and is capable of pumping 30 GPM at 15 FT. The motor horsepower is 1/4, the RPM is 1750. The serial number specifically identifies the unit for future reference. **DO NOT REMOVE THE NAMEPLATE.** It is important when ordering replacement parts to furnish complete nameplate data.

Following the procedure below will result in proper parts selection.

1. Determine from the nameplate the model number, pump construction and impeller diameter.
2. Refer to the index for the page number of the parts breakdown for the specific model pump.
3. Find the proper column in the parts breakdown for the pump construction involved.
4. Select part numbers using the numbered drawings on page 4 for identification.

How to Select Parts for Series 60 & 1522 Pumps on Pages 25-34

The pump nameplate identifies the pump by model number, pump construction and impeller diameter as shown below.

The nameplate above identifies the pump as a Series 60, size 1 1/4AA in bronze-fitted (BF) construction. The impeller diameter is 4 3/8" and is capable of pumping 21 GPM at 14 FT. The motor horsepower is 1/4, the RPM is 1750. The serial number specifically identifies the unit for future reference. **DO NOT REMOVE THE NAMEPLATE.** It is important when ordering replacement parts to furnish complete nameplate data.

Following the procedure below will result in proper parts selection.

1. Determine from the nameplate the model number, pump construction and impeller diameter.
2. Refer to the index for the page number of the parts breakdown for the specific model pump.
3. Find the proper column in the parts breakdown for the pump construction involved.
4. Select part numbers using the numbered drawings on pages 5, 6 & 7 for identification.

PARTS FOR PRESSURE REDUCING VALVES & DUAL UNIT VALVES (a)

ASSEMBLED REDUCING VALVES

ITEM NO.	DESCRIPTION	PART NUMBER
	Repair Kit*	118861
5	Diaphragm	118029
14	Rubber Check Valve (Round**)	V51658
11	Strainer (B-38, B-38TU, FB-38, FB-38TU, #6***)	118036
11	Strainer (#7***, B7-12)	189160
10	Strainer Nut & O-ring	V14609
	Tail Piece Assembly (B-38TU, FB-38TU, 8TU, F-8TU)	V51747
	Tail Piece Gasket	V51657

■ – Factory recommended spare parts.

(a) Parts are not available for the relief valve of each Dual Unit Valve model.

*Repair Kit includes diaphragm, rubber check valve, valve plate, stem assembly, strainers, hex nuts and loctite.

**Old style check valve is hexagon-shaped.

***Manufactured May, 1988 (E88 date code) and after.

NOTE: Consult factory if replacement parts other than those listed above are required.

Consult factory if replacement parts are required for old style reducing valves and dual unit valves with the following model no's: #6 and #7 (date code D88 and before), #12, D525, B3, B8, FB3, FB8, F3, F8, #3, #8 and B7.

*Body assembly includes seat ring.

**When replacing the disc, all six disc parts are necessary.

■ – Factory recommended spare parts.

How to Select Parts for Centrifugal Pump Accessories

The nameplate on any unit in the Centrifugal Pump Accessories line identifies the specific unit by product type, model number and six digit part number as shown in the example below right.

The nameplate identifies the product as a suction diffuser, model number JH-3 with a part number of 115035. The suction diffuser was manufactured in August, 1991. If the date code is not imprinted on the nameplate, a label displaying the date of manufacture identical to the example above the right can be found on the product. Although all nameplates in the Centrifugal Pump Accessories line do not look alike, all will display the product type, part number and model number. **DO NOT REMOVE THE NAMEPLATE OR THE LABEL.** They identify the unit for future reference. It is important when ordering replacement parts to furnish complete nameplate data.

To insure the correct parts will be selected, follow the procedure below:

1. Determine from the nameplate the product type, model number and six digit part number.
2. Determine the date the unit was manufactured. See chart below.
3. Refer to the index for the page number of the parts breakdown for the specific product type.
4. Find the proper column in the parts breakdown for the model number involved.
5. Select part numbers using the exploded views for parts identification.

DATE OF MANUFACTURE CODE									
The date code is made up of two or three characters depending upon the year.									
1946-1960 The number denotes the month. The last character is a letter and denotes the year.			1961-82 Two characters. First letter is month. Second letter is year.			1983- Three characters. The letter denotes the month. The numbers denote the year.			
1	January	G	1946	A	January	A	January	78	1987
2	February	H	1947	B	February	B	February	88	1988
3	March	J	1948	C	March	C	March	98	1989
4	April	K	1949	D	April	D	April	09	1990
5	May	L	1950	E	May	E	May	19	1991
6	June	M	1951	F	June	F	June	29	1992
7	July	N	1952	G	July	G	July	39	1993
8	August	P	1953	H	August	H	August	49	1994
