

TERMINALS, CONNECTORS *cont'd*

## Term Lok Compressor Repair Kit

Finally, a product that simplifies the repair of burned or damaged spade terminals when reconnecting or replacing a compressor. Fits both non-burned and burned terminals. Connects to the compressor via precision brass cylinders that fit over the terminals and connect with stainless steel set screws. Wires are permanently attached. Standard factory 600V, 65 strand machine wire. Easy to install and guaranteed for the life of the compressor.

| <b>TLC-3-12</b> | 3 Wire, 12 Gauge Connection Kit | 1             |

## Replacement Compressor Leads

Extreme heat within compressors typically causes failure of wiring insulation. This can cause corrosion to the inner strands of copper within the wire used for compressor hook-up. This reduces the power flow to the compressor causing the unit to overheat and can prevent the compressor from starting. A MINIMUM of 12" of wire must be removed. The DiversiTech Replacement Compressor Leads are ideal for replacing this corroded wiring. 24" leads also available for replacing wire all the way to the contactor and capacitor.
