

1/2"-13 x 1-1/2" Hex Head Tap Bolt

Part Number MB12112  
Category Number 4090  
UPC 781002588566

Hex Head Tap Bolts can be fastened into internally tapped holes or used with a nut to pull assemblies together over a long length. For adjustment applications, they may be used with jam nuts to secure the assembly in place. They are manufactured to the IFI-199 standard.

Physical Characteristics

|                              |                  |
|------------------------------|------------------|
| Type                         | Tap Bolt         |
| Head Type                    | Hex              |
| Grade                        | A                |
| Thread Style                 | Fully Threaded   |
| Thread Type                  | 2A               |
| Point Type                   | Non-Pointed      |
| Size                         | 1/2" x 1-1/2"    |
| Dia./Thread Size             | 1/2"-13          |
| Head Size                    | 3/4"             |
| Length (in)                  | 1-1/2"           |
| Thread Pitch\Thread Per Inch | 13               |
| Material                     | Low Carbon Steel |
| Finish                       | Zinc Plated      |

Packaging Details

|                |      |
|----------------|------|
| Standard Qty   | 50   |
| Master Qty     | 500  |
| Price Per      | 100  |
| Package Length | 6.10 |
| Package Width  | 4.80 |
| Package Height | 2.80 |
| Package Weight | 5.45 |
