MMB/SMB Spring Return Multi-Blade Zone Damper

DESCRIPTION:

The DuroZone Multi-Blade damper for residential zoning systems has been engineered to include many features. Ribbed for strength and extruded from lightweight aluminum, the sleek frame profile provides maximum strength without excessive reduction of free area inside the ductwork. The extruded aluminum blades are mounted with friction minimizing nylon bushings to provide easy transition between opening and closing. The DuroZone Spring Return Multi-Blade Dampers also feature damper blades designed to remain within the damper frame for easy insertion and an external side-mounted linkage for smooth and quiet operation. Multi-Blade dampers are available in 74 stock sizes with a 24-volt spring return "Mid-Torque" motor or a Power Open/Power Closed motor. An optional Spring Return High Torque motor is also available.

SUGGESTED SPECIFICATIONS:

Rectangular Parallel Blade Zone Dampers shall be Duro Dyne MMB or SMB type dampers. Damper blades and frames shall be manufactured of extruded aluminum. Damper motor will be spring return type designed to spring open upon loss of power. Installation shall be as described in the Duro Dyne MMB/SMB damper instructions. Sizes and locations shall be as indicated on the mechanical drawings.

Damper Specifications

Damper Component	Material	Width	Depth
Frame	Extruded Aluminum	4-1/16"	1/2"
Face Plate	Extruded Aluminum	5-9/16" (includes two 3/4" flanges)	5/16"
Blade	Extruded Aluminum	2-3/4"	3/32"
Gasket	Vinyl Nitrile	3/4"	1/2"
Bushings for blades are nylon 5/8" outside diameter with a 3/8" square hole			
All blade linkage is 16 gage galvanized steel
