Note: The width dimension is determined by the slot width and the number of slots.

Linear and Slot Diffusers

Damper

Single-leaf dampers are furnished in each slot opening throughout the entire diffuser length when specified. Dampers are fastened to the margin and are spring-loaded to hold their setting at all duct pressures. They are face-operated with a removable operator. Multiple dampers are furnished for grille lengths over 24 inches.

Dampers are part of the S Series and are not specified separately.

No. 2

Frames

Plaster frames are available to provide a positive-dimensioned ceiling or wall opening for the diffuser or grille.

Frames for S Series diffusers are furnished with formed bridge spacers to maintain a uniform rigid opening during installation. The duct collar is fastened to the frame.

See specific S Series for frame dimensions and installation details.

90-degree mitered corners are available as factory-fabricated sections. Precise factory cutting and assembly reduces field fabrication time and assures proper fit. Mitered corner sections are furnished in one piece, with pattern deflectors and dampers in the dimensions as indicated. Corner sections butt to adjacent straight sections, which are spliced together with aligning keys.

Mitered corners are furnished in style #4 (with pattern controller and damper). When viewed from the room side, the mitered corner section appears identical to the butting straight sections.

Plaster frame mitered corners can be specified with the outlet mitered corner.

**S SERIES
MITERED CORNERS**

S Series Mitered Corners

90-degree mitered corners are available as factory-fabricated section. Precise factory cutting and assembly reduces field fabrication time and assures proper fit. Mitered corner sections are furnished blanked off and in one piece with the dimensions as indicated. Corner sections butt to adjacent straight sections, which are spliced together with aligning keys.

Mitered corners are furnished in style #4 (with pattern controller and damper). When viewed from the room side, the mitered corner section appears identical to the butting straight sections.

Plaster frame mitered corners can be specified with the outlet mitered corner.
