

Wire Pulling Foam Lubricant

Klein Tools' Foam Wire Pulling Lubricant is a no mess, no hassle alternative to traditional wax/gel lubricants. The foam fills the conduit and coats the wires as they are pulled through. The lubricant stays where it is applied, even in vertical conduit. It also dissolves clean from hands, clothing and carpeting.

Specifications

Application:	Wire Pulling	Special Features:	Coats Better and 30% More Slippery than Gel or Wax Lubricants
Size:	19 oz (0.6 L)	Container:	Aerosol Can
Working Temperature:	40° F to 100° F (4° C to 38° C)	Weight:	1.2 lb (0.5 kg)
