6" x 20" CATCH BASIN

Specification: MIFAB Series T1400-CB620, 6" wide, 20" long x 19.69" deep catch basin. Body is manufactured from polypropylene. Each body has four tabs for #3 rebar tie down and leveling. Bodies have interlocking ends and a radiused bottom for efficient liquid drainage. End outlets are available in 2", 3" and 4" no hub outlet connections. Grate options include ductile iron, galvanized steel, stainless steel and plastic along with grate lockdown hardware for each grate to secure to the body. These grates are available in Class A, B, C, D and E along with ADA compliance.

Function: Used in airports, car washes, malls and plazas, golf courses, factories and any other facilities that require large areas of surface drainage. Typically installed in the middle of a T1400 section of trench drain to receive debris and redirect waste water. Chemical resistant polypropylene material provides for long life.

CROSS INSTALLATION

4" SLIP FIT CONNECTION

- **4" OUTLET SLIP FIT CONNECTION** - can be used on any flat wall to create an outlet.
- **Catch basin inlet adapter** - allows for easy connection of any depth trench body section into catch basin.

T1400-CB620 - Features and Benefits

- **Lightweight and Strong** - Polypropylene material is acid resistant and lightweight for easy handling.
- **Interlocking Connections** - Body sections are easily snapped into both ends of the catch basin. No screws, hardware or transition pieces are required. The catch basin has knockout connections at both ends to receive the trench drain body section. This ensures that the trench drain body sections always drain to the catch basin.
