

C-251 Freezeless Ground Hydrant

close-up view

- Freezeless
- Variable Flow
- Time Tested

PRIER's C-251 Freezeless Ground Hydrant provides a year round source of water to areas subject to freezing temperatures. The hydrant valve is connected to the supply piping below the frost line, and since it drains automatically, it is not subject to freezing.

The PRIER C-251 is a time tested design with a cam type operation lever control that provides full variable flow. It is available from stock in bury depths from 1' to 6', longer sizes are available upon request.

FEATURES

- Solid, extra thick walled head casting
- 3/4" and 1" FPT inlet connection options
- Solid brass hose adapter
- Cam type operating lever control provides full variable flow
- High quality steel drawstraps that eliminate side pull of operating rod
- Pivot connector has double nut connection, no set screws to rust in place
- Galvanized outer pipe with exposed threads coated to protect from erosion
- Stainless steel operating rod provides the longest operating life
- Simple repair can be done at ground level
- Bucket hook on spout

ORDERING

C-251-3

Inlet

0 - 3/4" FPT
1 - 1" FPT

Bury Depth

1- 1' Bury Depth
2- 2' Bury Depth
3- 3' Bury Depth
4- 4' Bury Depth
5- 5' Bury Depth
6- 6' Bury Depth
