Equipment Mounting

Heavy duty framework systems for equipment mounting on flat roofs.

The Advantages of Big Foot Systems.

The industry standard

Big Foot Systems set the industry standard for free standing flat roof mounting of air conditioning, refrigeration and other equipment.

The system is modular and completely flexible. Allows for multiple design layouts. Mounting is strong, secure, flexible, vibration absorbing and leak proof.

Installation is quick, clean, practical and aesthetically pleasing. Free-standing design makes roofing repairs simpler and resurfacing less costly.

Rugged removable legs Each leg assembly holds 720 lbs. and can be removed individually. Costly removal of equipment is unnecessary when re-roofing or resurfacing.

Optimum weight distribution The Big Foot base is designed to transfer weight beyond the roof's center stress point.

Optimum strength and durability The Big Foot base is made of glass filled Nylon with UV protection. Frameworks are hot dip galvanized for all weather protection.

Quiet durability Each foot assembly includes a recycled crumb rubber pad for vibration isolation and to protect the roof surface.

Quick on-site leveling The legs allow for vertical height adjustment to permit easy leveling. A stepped roof option is available.

Reduced risk of roof leaks The Big Foot System does not penetrate the waterproof membrane, eliminating difficult flashing around concrete structures. The roofing system warranty is never compromised.

Architecturally friendly Big Foot clean contemporary framework suspends equipment above the roof surface, allowing for a simpler, more flexible roof design.

Equipment Clamps secure equipment at both ends of crossbars and are fully adjustable.

Linear Adjustment The cross bars supporting the equipment slide along the end bars into position required, then are locked securely in place.

Leg Assembly Positioning The leg assembly is typically positioned outside the frame work, but can be placed inside the framework to avoid an obstruction, if necessary.

Custom frameworks

For larger, more complex projects, RectorSeal offers a custom frame design service. Available upon request for Big Foot frames, Cube & Beam assemblies, Computational Fluid Dynamics (CFD) modeling and engineering design & analysis.

Angled AV Pads The solution to sloping roofs. 2.5° & 5° AV pads are available for 12" & 18" feet.

Leg Height Adjustment 11³/₈" - 15⁵/₈" : floor to top of framework.

Linear Adjustment The cross-bars which support the condenser units can slide along the plain bars into the position required, then are locked securely in place.

Equipment Clamps secure equipment and are fully adjustable on both sides of the cross-bars.

Leg Assembly Positioning The leg assembly is typically positioned outside the frame work, but can be placed inside the framework to avoid an obstruction, if necessary.

Foot Protection Covers are recommended for use on PVC membrane roof surfaces to prevent migration of plasticizers.

Frame Supports

Ideal for constructing your own support system on rooftops, floors or slabs.

Frame Supports provide the base and essential hardware. This system can then be used for piping, tray systems or ductwork. The bases include recycled crumb rubber pads to cushion and protect the roof or other surface. Framework must be cut and fit on-site using readily available 1 5/8" strut and 1/2" threaded rod (not included).

INABA DENKO®

RD Series

Commercial Lineset Metal Ducting Systems

**for VRF Linesets on Rooftops
& Vertical Building Surfaces**

STRENGTH

PROTECTION

DURABILITY

RD Series commercial lineset ducting.
**Designed to meet the demands of the expanding
market trend towards VRF applications.**

Triple hot dipped protection.

RD ducts and fittings feature ZAM® brand hot dip coating for excellent durability. ZAM® features three layers of protection - zinc, aluminum and magnesium.

Superior corrosion & scratch resistance.

RD/ZAM hot coated steel sheet delivers corrosion resistance 10 to 20 times greater than that of ordinary galvanized steel sheet and 5 to 8 times more than zinc-aluminum alloy coated steel sheet when subjected to accelerated spray salt testing. ZAM® coating provides better scratch resistance.

Tough ZAM® coating outperforms galvanized steel. Stainless steel duct & fittings are available by special order only. Optional anti-slip walking surface is available for select RD duct and fittings.

PVC Duct Systems for Light Commercial VRF & Industrial Linesets

Functional & Professional Appearance

Light & Tough: UV & weather resistant heavy duty PVC construction resists deformation.

The PD series is designed to protect linesets from the elements, vandalism and mechanical damage while enhancing the external appearance of the entire system.

Currently available in 2 sizes, 3.5" diameter and 4.7" diameter, this series is designed primarily for use in smaller VRF systems where use of the larger metal RD series is not needed.

It can also be used in conjunction with the RD series to cover the linesets from the condenser to the point where they enter the Metal Duct system.

It is particularly effective for cladding any configuration of final connections into a condenser.

In addition, this series can be used for industrial linesets for both refrigeration and conventional Air Conditioning applications.

The PD Series can be fitted during the installation process or can easily be retrofitted after the linesets have been installed.

Easy Installation: All duct and fittings disassemble for ease of installation and mount with commercially available standard wall mounted pipe brackets.

Step 1: Clip duct into place over installed lineset.

Step 2: Install mounting couplers & fittings.

Step 3: Secure with provided screws.

It's in the Code. Effective February 2009 the International Mechanical Code and International Residential Code now require that all outdoor access ports on AC Refrigerant circuits be made tamper resistant.

International Mechanical Code 1101.10 -

Locking access port caps. "Refrigerant circuit access ports located outdoors shall be fitted with locking-type tamper resistant caps."

International Residential Code M1411.6 -

Locking access port caps. "Refrigerant circuit access ports located outdoors shall be fitted with locking-type tamper resistant caps."

NOVENT®

Locking Refrigerant Caps

Dual protection

One simple screw-on installation.

NOVENT® locking caps seal standard Schraeder service valves on all central AC units and minisplits to help prevent refrigerant leakage. Novent provides dual protection with a single screw-on installation. Safe guard your AC system's efficiency and the environment from lost or accidental mixing of refrigerant gases. Help protect children from serious injury or death resulting from the inhalation of dangerous refrigerants.

Patented Novent Caps are precision machined from high grade brass surrounded by a protective aluminum shroud and can only be installed and removed with a special tool.

- Integral neoprene O-ring resists oils & sealants
- Integral torque limiter prevents overtightening
- Resists crushing & removal without key
- Corrosion resistant
- Selection of installation tools available

Caps available in blister packs of 2 or 10 & box of 50.

SILVER universal caps are for commonly used refrigerants.

R22 & R410 color coded caps and embossed ID prevent refrigerant gas mixing.

NOVENT® products are available only to licensed refrigerant technicians and authorized personnel. They are distributed exclusively through HVACR distributors worldwide.

RS #	DESCRIPTION	QTY
97622	SS 610 E	12

• Designed for mini split systems • For installation directly on primary drain pan or clipped to coil above primary drain pan • Multi-voltage • Can be wired in both normally open & normally closed systems

FEATURES

- Sensor connects to indoor mini split units
- Attaches to pan or coil with unique bracket
- Onboard LED indicator can be mounted to side of unit
- No batteries required
- Patent Pending

FEATURES

- Dual sensors
- Simple 2-wire design
- Onboard LED indicator
- Connect to either red or yellow wire

RS #	DESCRIPTION	QTY
97692	SS 103 E	24

• For primary drain line and auxiliary drain pan or primary drain line and auxiliary drain outlet • Can be installed horizontally or vertically or inline • Onboard LED indicates the condition of the unit at a glance • No moving parts

FEATURES

- Commercial rooftop downflow units
- Plenum rated wire
- Simple 2-wire design
- Onboard LED indicator
- Connect to either red or yellow wire

RS #	DESCRIPTION	QTY
97693	SS 500 EP	24

• Install on primary drain pan when plenum rating is needed • Small size and slim profile great for use on commercial rooftop downflow units

FEATURES

- Works in any position directly in the secondary drain pan
- Universal puck works in all secondary drain pans
- Onboard LED indicator

RS #	DESCRIPTION	QTY
97695	SS 700 E	24

• Designed to sit directly in a secondary drain pan, eliminating screws and clips • Multiple position option for the sensor and provides adjustable heights • Great for use in plastic overflow pans with round edges

SmartTrap™ Kits

Float switch overflow protection. Clear cleanable trap.

RS #	DESCRIPTION	SIZE
83210	EZT-210	3/4"

Standard SmartTrap kit

Fits most applications requiring automatic shut down.

10 per carton.

Includes: 3/4" Standard Trap, 3/4" cross, 3/4" red cap, 1"x 3/4" bushing, 3/4" tee, 3/4" black stub, 3/4" male adapter, float switch assembly, 48" cable, cleaning brush, 1" drop

UltraTrap™ Waterless Condensate Traps

RS #	DESCRIPTION	SIZE
83180	EZT-180	5/8"

Mini waterless in-line trap

Sized for use in ductless mini-split applications. Use on any mini-split evaporator with gravity drain.

Permits free condensate flow while blocking odors, noise and insects. Freeze resistant. Only 2-3/4" long. 10 per carton.

Includes: 5/8" MiniTrap, 9/16" adapter

Mini-Split Condensate Drain Hose and Fittings

STANDARD HOSE

Corrugated construction provides maximum flexibility, eliminates crimping; interior use only.

Smooth Bore

Resists clogging, reduces resistance and maximizes condensate flow, less flexible than standard hose.

UV Resistant

Resists deterioration from Sunlight, suitable for exterior applications.

Insulated

Eliminates sweating that can occur in dead airspace.

SLIMDUCT®

Lineset Ducting System

Quick Installation

Application. Slimduct® is perfect for minisplits, high velocity and conventional ducted split air conditioning systems.

Strong. Slimduct® ducting is extruded with our special formula rigid polyvinyl chloride. Slimduct is UV, weather & fire resistant, with a temperature range from -4°F to 140°F. The result is a long lasting quality product that will remain attractive and provide protection for many years.

Protective. Slimduct® protects lineset, wiring and drain hose from weather, vandalism, pet and pest damage.

Easy to install. Slimduct® installs quickly, and can be easily accessed for repairs or replacement of the lineset.

Stylish. Slimduct® offers three duct sizes. Each size is available in three neutral colors - white, ivory and brown. Slimduct colors are designed to compliment any natural stone, brick, wood, stucco, vinyl or painted facade, and can be used for both residential or commercial installations.

Lineset Covers

Professional grade ducting, protects and hides unsightly mini-split linesets in a snap!

Fortress: • Standard professional grade • Satin finish • More moderate price point

- 2 sizes. Duct & fittings are available in both 3 $\frac{1}{2}$ " or 4 $\frac{1}{2}$ "
- 4 colors. Choose white, ivory, brown or gray.
- 17 fittings. Assures complete flexibility of installation.
- 8' lengths. 6 lengths per box
- 6 fittings per box. Efficient ordering and inventory.
- 1 year warranty.

3-Step Installation

Step 1. Secure base

Step 2. Place lineset

Step 3. Clip on covers

Traditional

Fortress

Application. Fortress® is perfect for minisplits, high velocity and conventional split air conditioning systems.

Strong. Fortress® ducting is extruded with our special formula rigid polyvinyl chloride, which is UV and weather resistant. The result is a long lasting quality product that will remain attractive and provide protection for many years.

Protective. Fortress® protects lineset, wiring and drain hose from weather, vandalism, pet and pest damage.

Easy to install. Fortress® installs quickly, and can be easily accessed for repairs or replacement of the lineset.

Stylish. Fortress® eliminates unsightly lineset used in a typical installation. Ducting is available in two lineset sizes and four neutral colors - white, ivory, brown and gray to compliment any residential or commercial building.

Paintable. Brush, spray or roller to match or compliment custom colors. Follow paint manufacturers recommendations for vinyl products.

Risers

Ideal for simple and secure mounting of small and large piping systems, ductwork runs, cable trays, and smaller equipment such as condensers. Manufactured from recycled crumb rubber with a fully adjustable aluminum mounting track. Not recommended for large equipment.

RS # (ref. #)	DESCRIPTION	WT LBS.
87772 (RMB10L)	FIX-IT-FOOT LOW 10"	2.6
87774 (RMB16L)	FIX-IT-FOOT LOW 16"	5.5

Low Profile Rubber Risers offer significant vibration isolation, and are ideal for rooftop support of equipment and systems. Aluminum linear track permits the use of standard strut hardware (not included). Underside has recessed area to permit easy leveling.

Materials: Recycled Crumb Rubber/Aluminum

Max weight capacity:

RMB10L - 356 lbs RMB16L - 572 lbs

RS # (ref. #)	DESCRIPTION	WT LBS.
