FUNCTIONAL DESCRIPTION

SDR11 compression-sleeve fittings are designed for all heating and snow and ice melting applications as well as hydronic distribution connections. SDR11 compression-sleeve fittings and compression sleeves can be walled in, including applications above the ceiling, or embedded directly in a thermal mass. In both cases, check local code compliance. Installation in thermal mass requires the fittings and sleeves to be wrapped in waterproof, rubber tape or RAUCROSS™ heat shrink tubing to help reduce corrosion caused by the surrounding environment.

Installation is performed with SDR11 compression-sleeve tools. Tapered end of sleeve installs toward fitting. Follow all published installation instructions. Not certified for potable water.
