

PRODUCT SUBMITTAL 972

Product: SDR11 Compression Sleeve
Date: 31 January 2017 (supersedes 30 April 2013)

Article No.	Nominal Size mm	Dimensions in (mm)	
		A	B
200536-001	10.1	0.590 (15)	0.630 (16)

TECHNICAL DESCRIPTION

Specification	For use with pipe in accordance with DIN 16892 and ISO 15875
Material	Brass according to DIN EN 12164 to 12168, post-process plated

FUNCTIONAL DESCRIPTION

SDR11 compression sleeve is intended for use in radiant heating applications, when used with RAUPEX[®] SDR11 PEXa pipes. SDR11 compression-sleeve joints create reliable connections that can be walled in or embedded directly in a thermal mass, when wrapped in waterproof, rubber tape or RAUCROSS[™] heat shrink tubing for corrosion protection (check local codes for compliance).

Installation is performed with SDR11 compression-sleeve tools (Art. 228396-001). Tapered end installs toward fitting. Follow all published installation instructions.
