Wall-Mounted Wind-Free™ for North America
(R410A, 60Hz, HP)

Nomenclature

Model Name

AM	005	T	N	V	D	C	H	/	AA
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)		Buyer

(1) Classification

AM	DVM
----	-----

(5) Product Notation

A	EEV NOT INCLUDED
V	EEV INCLUDED

(2) Capacity

X kBtulh (3 digits)

(6) Feature

D	DELUXE
---	--------

(3) Version

T	2020
---	------

(7) Rating Voltage

C	1Ø, 208~230V, 60Hz
---	--------------------

(4) Product Type

N	Indoor Unit
---	-------------

(8) Mode

H	Heat Pump (R410A)
---	-------------------

Features & Benefits

Wind-Free™ Cooling

Get cool fast, stay cool without direct wind.

23,000 Micro air holes

Stay feeling comfortable cool with Wind-Free™ Cooling. It cools gently and quietly without the unpleasant feeling of cold wind on your skin, as it disperses air through 23,000 micro air holes. It creates a "Still Air" environment* with a very low air speed and much less noise**. Its advanced airflow structure also means it cools a wider and larger area more evenly.

* ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) defines "Still Air" as air currents at speeds below 0.15m/s which lacks the presence of cold draft s. ** Tested on the AR12TXCAWKNEU model. Wind-Free™ mode generates only 23dB of noise, compared to 26dB with the Samsung conventional model.

Features & Benefits

Easy Filter Plus

Easy to clean filter.

Easy to detach

Easy to clean

Keep your air conditioner working efficiently with less effort. Unlike conventional filters that are often difficult to access, the Easy Filter Plus is located outside, on the top. So it can easily be taken out and cleaned – without having to open a cover or pull hard. It is also made of a dense mesh, so it's very effective at capturing dust, which keeps the Heat Exchanger clean and working efficiently.

Features & Benefits

4-Way Swing

Control the wind direction Up/Down, Left/Right using remote controller. Control the wind to your desired location.

* May differ based on the model & region.

Temperature Display

A numerical and intuitive icon display helps you to read the temperature and functions easily.

* The Wind-Free™ unit delivers an air current that is under 0.15 m/s while in Wind-Free™ mode. Air velocity that is below 0.15 m/s is considered "still air" as defined by ASHRAE 55-2013 (American Society of Heating, Refrigerating, and Air-Conditioning Engineers).

NOTE

- Mode : HP(Heat Pump), HR(Heat Recovery)
- Nominal Cooling : Indoor temperature 26.7°CDB / 19.4°CWB(80°F DB/67°F WB), Outdoor temperature 35°CDB / 23.9°CWB(95°F DB/75°F WB), Refrigerant pipe length 7.5m(25ft), Level difference 0m(0ft).
- Nominal Heating : Indoor temperature 21.1°CDB / 15.6°CWB(70°F DB/60°F WB), Outdoor temperature 8.3°CDB / 6.1°CWB(47°F DB/43°F WB), Refrigerant pipe length 7.5m(25ft), Level difference 0m(0ft).
- Sound level was acquired in an anechoic room. Thus actual noise level may be different depending on the installation conditions.
- These products contain R410A which is fluorinated greenhouse gas.
- Specifications may be subject to change without prior notice.
- Select wire size based on the value of MCA
- The Wind-Free™ unit delivers an air current that is under 0.15 m/s while in Wind-Free™ mode. Air velocity that is below 0.15 m/s is considered "still air" as defined by ASHRAE 55-2013 (American Society of Heating, Refrigerating, and Air-Conditioning Engineers).

9. Piping Diagram

EEV included Model

Refrigerant flow	
Cooling	Heating

10. Installation

Selecting the installation location

Indoor Unit

- Where airflow is not blocked.
- Where cool air can be distributed throughout the room.
- Install the refrigerant piping length and the height difference of both indoor and outdoor units as indicated in the installation diagram.
- Wall that prevents vibration and is strong enough to hold the product weight.
- Out of the direct sunlight.
- 1m or more away from the TV or radio (to prevent the screen from being distorted or noise from being generated).
- As far away as possible from fluorescent and incandescent lights (so that the remote control can be operated well).
- A place where the air filter can be replaced easily.

CAUTION

- Do not install the product with EEV (commercial model) in a quiet place such as bedroom, hotel, and hospital. If installation is required in a place, install the indoor unit that has no EEV along with the EEV kit.
- Avoid the following places to prevent malfunction of the unit.
 - Where there is machine oil
 - Salty environment such as the seaside areas
 - Where sulfide gas exists
 - Other special atmosphere areas

Space requirements for installation & service

Observe the clearances and maximum lengths as seen in the picture below when installing the air conditioner.

NOTE

- The appearance of the unit may be different from the diagram depending on the model.

Installing the indoor unit

Before fixing the installation plate to the wall or window frame, you must determine the position of the 2.56 inch(65 mm) hole through which the cable, pipe and hose pass to connect the indoor unit to the outdoor unit. When facing the wall, the pipe and cable can be connected from the:

- Right
- Left
- Underside (right)
- Rear (right or left)

- 1 Determine the position of the pipe and drain hose hole as seen in the picture and drill the hole with an inner diameter of 2.56 inch(65 mm) so that it slants slightly downwards.

10. Installation

Pipe bundle hole: 2.56 inch (Ø65 mm) (Unit: inch (mm))

Model	a	b	c
005/007/009/012	6.50 (165)	12.01 (305)	16.38 (416)
015/018/024/028	5.91 (150)	12.01 (305)	25.61 (650.5)

- If you fix the indoor unit to a wall, fix the installation plate to the wall giving attention to the weight of the indoor unit.

NOTE

- If you mount the plate to a concrete wall by using plastic anchors, make sure that gaps between the wall and the plate, created by projected anchor, are less than 0.79 inch (20 mm)
- If you fix the indoor unit to a window frame, follow 4 to 6.
 - Determine the positions of the wooden uprights to be attached to the window frame.
 - Attach the wooden uprights to the window frame giving attention to the weight of the indoor unit.
 - Attach the installation plate to the wooden uprights using tapping screw.

Installing the drain hose

When installing the drain hose for the indoor unit, check if condensation draining is adequate. When passing the drain hose through the 2.56 inch (65 mm) hole drilled in the wall, check the following:

- If necessary, connect the 6.56 ft (2 meter) extension drain hose to the drain hose.
- If you use the extension drain hose, insulate the inside of the extension drain hose with a shield.
- Fit the drain hose into 1 of 2 drain hose holes, then fix the end of the drain hose tightly with a clamp.

NOTE

- If you don't use the other drain hose hole, block it with a rubber stopper.
- Pass the drain hose under the refrigerant pipe, keeping the drain hose tight.
 - Pass the drain hose through the hole in the wall. Check if it slants downwards as seen in the picture.

NOTE

- The hose will be fixed permanently into position after finishing the installation and the gas leak test; refer to page 9 for further details.
- DO NOT WALL UP THE DRAIN HOSE CONNECTION! Drain hose connection must be easy accessible and serviceable.

10. Installation

Connecting the power and communication cables

- 1 Before wiring work, you must turn off all power source.
- 2 Indoor unit power should be supplied through the breaker (ELCB or MCCB+ELB) separated by the outdoor power.
 - ELCB:Earth Leakage Circuit Breaker
 - MCCB:Molded Case Circuit Breaker
 - ELB:Earth Leakage Breaker
- 3 The power cable should be used only copper wires.
- 4 Connect the power cable (1(L), 2(N)) among the units within maximum length and communication cable (F1, F2) each.
- 5 Connect F3, F4(for communication) wires at the back side of the indoor unit when installing the wired remote control.

- ELCB : Essential Installation
- The EEV Kit is optional component.

WARNING

- Power off before connecting any wires; Indoor PBA will be damaged while V1, V2, F3, F4 short each other.
- You must connect the earth cable. If earthing is not complete, electric shock or fire may occur.

10. Installation

Specification of electronic wire

Power supply	MCCB	ELB or ELCB	Power cable	Earth cable	Communication cable
Min : 198V Max : 242V	XA	XA, 30 mmA, 0.1 s	0.0039 inch ² (2.5 mm ²)	0.0039 inch ² (2.5 mm ²)	0.0012 to 0.0023 inch ² (0.75 to 1.5 mm ²)

- Refer to the unit nameplate for rating current.
- Decide the capacity of ELCB(or MCCB+ELB) by below formula.
- Power supply cords of parts of appliances for outdoor use shall not be lighter than polychloroprene sheathed flexible cord. (Code designation IEC:60245 IEC 57 / CENELEC: H05RN-F or IEC:60245 IEC 66 / CENELEC: H07RN-F)

The capacity of ELCB(or MCCB+ELB) $X[A] = 1.25 \times 1.1 \times \sum A_i$

- X : The capacity of ELCB(or MCCB+ELB).
- $\sum A_i$: Sum of Rating currents of each indoor unit.
- Refer to each installation manual about the rating current of indoor unit.

- Decide the power cable specification and maximum length within 10% power drop among indoor units.

$$\sum_{k=1}^n \left(\frac{\text{Coef} \times 35.6 \times L_k \times i_k}{1000 \times A_k} \right) < 10\% \text{ of input voltage [V]}$$

- coef: 1.55
- Lk: Distance among each indoor unit [m(ft)],
- Ak: Power cable specification [mm² (inch²)]
- ik: Running current of each unit [A]

Example of Installation

- Total power cable length L = 328.08 [ft.] (100 [m]), Running current of each units 1[A]
- Total 10 indoor units were installed

- Apply following equation.

$$\sum_{k=1}^n \left(\frac{\text{Coef} \times 35.6 \times L_k \times i_k}{1000 \times A_k} \right) < 10\% \text{ of input voltage [V]}$$

- Calculation

- Installing with 1 sort wire

$$\begin{aligned} & \frac{0.0039 \text{ inch}^2 (2.5 \text{ mm}^2)}{2.2 \text{ [V]}} + \frac{0.0039 \text{ inch}^2 (2.5 \text{ mm}^2)}{2.0 \text{ [V]}} + \dots + \frac{0.0039 \text{ inch}^2 (2.5 \text{ mm}^2)}{208.8 \text{ [V] (Within 187V~253V)}} \\ & - (2.2+2.0+1.8+1.5+1.3+1.1+0.9+0.7+0.4+0.2) = -11.2 \text{ [V]} \end{aligned}$$

it's okay

- Installing with 2 different sort wire.

$$\begin{aligned} & \frac{0.0062 \text{ inch}^2 (4.0 \text{ mm}^2)}{1.4 \text{ [V]}} + \frac{0.0062 \text{ inch}^2 (4.0 \text{ mm}^2)}{1.2 \text{ [V]}} + \dots + \frac{0.0039 \text{ inch}^2 (2.5 \text{ mm}^2)}{209.5 \text{ [V] (Within 187V~253V)}} \\ & - (1.4+1.2+1.8+1.5+1.3+1.1+0.9+0.7+0.4+0.2) = -10.5 \text{ [V]} \end{aligned}$$

it's okay

10. Installation

CAUTION

- Select the power cable in accordance with relevant local and national regulations.
- Wire size must comply with local and national code.
- For the power cable, use the grade of H07RN-F or H05RN-F materials.
- You should connect the power cable into the power cable terminal and fasten it with a clamp.
- The unbalanced power must be maintained within 10% of supply rating among whole indoor units.
- If the power is unbalanced greatly, it may shorten the life of the condenser. If the unbalanced power is exceeded over 10% of supply rating, the indoor unit is protected, stopped and the error mode indicates.
- To protect the product from water and possible shock, you should keep the power cable and the connection cord of the indoor and outdoor units in the iron pipe.
- Connect the power cable to the auxiliary circuit breaker. An all pole disconnection from the power supply must be incorporated in the fixed wiring (≥ 0.12 inch (3mm)).
- You must keep the cable in a protection tube.
- Keep distances of 1.97 inch (50 mm) or more between power cable and communication cable.
- Maximum length of power cables are decided within 10% of power drop. If it exceeds, you must consider another power supplying method.
- The circuit breaker (ELCB or MCCB+ELB) should be considered more capacity if many indoor units are connected from one breaker.
- Use round pressure terminal for connections to the power terminal block.
- For wiring, use the designated power cable and connect it firmly, then secure to prevent out-side pressure being exerted on the terminal board.
- Use an appropriate screwdriver for tightening the terminal screws. A screwdriver with a small head will strip the head and make proper tightening impossible.
- Over-tightening the terminal screws may break them.
- See the table below for tightening torque for the terminal screws.

Tightening torque		
	N•m	ft•lb
M 3.5	0.8 ~ 1.2	0.59 ~ 0.89
M 4	1.2 ~ 1.8	0.89 ~ 1.33

(1 N•m = 10 kgf•cm)
