Roof Jack Support System

NOTICE

The Roof Jack Support System, is available from 5" thru 24" and is recommended to be used on all through the roof vent terminations having multiple joints above the roof line with combustible or non-combustible roof structures.

Prepare the breach location of the roof that will accept the Roof Jack Support System by drilling a small hole, marking the center of the vent termination. See below for Dimensions and Z-Vent Installation Guide for Roof Jack Support System maximum vent gas temperature, combustible clearance and minimum inside opening for framing.

This warranty shall extend to the original purchaser of the Z-VENT® or, if purchased by a contractor, to the end user. This warranty is valid for a period of fifteen (15) years from the date of purchase, provided that the Z-VENT® has been installed according to Z-Flex® installation instructions. Deviating from the installation and use instructions included with the Z-VENT® will void the warranty. IF DETERIORATION IS DETECTED CEASE USE OF HEATING SYSTEM AND CALL FURNACE/BOILER INSTALLER FOR REMEDIAL ACTION.

Please note: Different manufacturers have different joint systems and adhesives. Do not mix pipe, fittings or joining methods from different manufacturers without an approved adapter, as doing so will void any and all warranties.

To activate the warranty, the end-user must complete and return the Z-Flex® Warranty Registration Card within ninety (90) days of installation of the Z-VENT®. Upon written

notice of any defects, Z-Flex® reserves the right to examine or establish reasonable proof of defective material or workmanship justifying replacement.
